For Immediate Release

### MotoUP Partners with American Racing

MotoUP, a 501(c)(3) nonprofit charity incubator, has partnered with Moto2 team, American Racing, for the upcoming MotoGP Red Bull Grand Prix of the Americas event held at Circuit of the Americas in Austin, Texas from April 8-10, 2022. MotoUP hosts an elevated VIP suite experience where a unique blend of motorcycle enthusiasts and technologists come together to support the rehabilitation of combat wounded veterans through motorsports.

Team MotoUP is a passionate group of volunteers that has an innate way of coupling their love of motorsports with their love of giving back to the veteran community. Each year MotoUP chooses a new beneficiary that is assisting our combat wounded veterans in the local community. Since its founding in 2019, MotoUP has raised over \$53,000 to various nonprofit organizations. This year's beneficiary is Motorcycle Missions based out of Austin, Texas.

MotoUP's sole fundraising event for the year is during the MotoGP Grand Prix of the Americas. The team is beyond excited to partner with the American Racing Team to provide an elevated experience to our in-suite guests. American Racing is the ONLY all-American racing team in the MotoGP paddock. The team has two extremely talented Americans who will be fighting for the Moto2 championship this season. Cameron Beaubier will return for the second year to American Racing joined by MotoAmerica Supersport Champion, Sean Dylan Kelly.

"We couldn't be more excited to have this partnership with the only all-American racing team in the MotoGP paddock," explained MotoUP President, Juan Toves. Having access to the American Racing team in our military veteran focused VIP suite is icing on the cake, he continued. American Racing team owner, Eitan Butbul, responded, "we are happy to support this incredible initiative to aid the veteran community."

This event is dedicated to raising awareness for combat wounded veterans suffering from Post-Traumatic Stress Disorder (PTSD). The 3-day event will include food, beverages, special guest appearances, panel discussions and an opportunity to network with top C-suite level executives from innovative technology companies. "The volunteers at MotoUP saw something special in bridging the gap between the military, technology and racing communities. Our panel discussions have really highlighted that," said Mr. Toves. This is the suite to be in!
